9" WOOD CHIPPER

CH922DH CHIPPER

COMPACT, POWERFUL & PROVEN.

The powerful CH922DH 9" Bear Cat wood chipper is packed with features to make your chipping job effortless and fast.

If you want a chipper that is small and compact enough to use on your little jobs with narrow driveways, yet big, strong, and powerful enough to use on your largest jobs; this is it!

With a reliable 50hp Kubota liquid cooled diesel engine to turn the 125kg balanced chipping disc, it builds up very impressive momentum to power through branches. With four reversible cutting knives, it hardly even notices the toughest branch or tree.

The large 38cm (15") variable-speed feed roller, and the "try again" feed system which automatically retries feeding stubborn limbs, makes an effortless chipping operation.

The compact trailer which is mounted on 15" tires, is equipped with torsion axle suspension to make it effortless to tow behind a ute or truck.

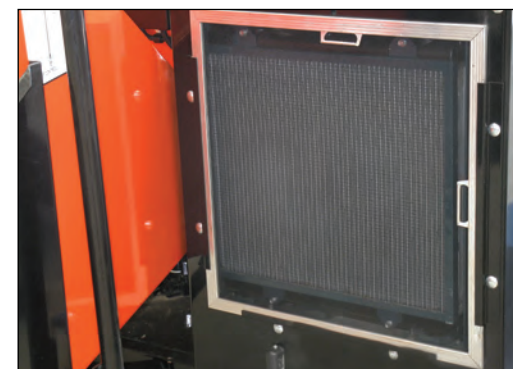

With this very strong and robust machine weighing in at 1230kgs this is a chipper that is ideally suited to all the rigors of all day use by arborist contractors, municipal work crews, rental companies and golf courses. Having been in New Zealand for over 10 years there is plenty of satisfied testimonials for you to talk to!

ON BOARD HYDRAULIC JACK
The on board hydraulic jack easily raises the feed roller for fast and simple in-field servicing.

QUICK EASY BLADE ACCESS
Easy access to the 125kg disc with the four reversible blades. The blades are very simple to turn and don't require constant adjustment like some chippers. The extra large airflow paddles stop blocking even in the wettest conditions.

REAR FACING RADIATOR
The rear facing radiator is a massive plus. This is because the dust caused when firing into a truck can easily block the front facing radiators on other brands, causing regular overheating.

EASY TO ADJUST DRAW BAR
The draw bar is quick and simple to adjust - just remove one pin to change the length. This makes reversing a lot easier down narrow driveways.

CH922DH CHIPPER SPECIFICATIONS

General Dimensions

Chipper Capacity (in)	9
Length, Width, Height (m)	3.2 x 2.03 x 2.4
Weight (kgs)	1230
Fuel Tank (l)	72 (19 gal.)
Hydraulic Tank (l)	11.5 (3 gal.)

Engine

Make	Kubota, Liquid Cooled
Gross HP	50hp (2.2 litre)
Fuel Type	Diesel
No. of Cylinders	4

Cutting System

Disc Size (cm)	76.2d x 3.175w (30" x 1.25")
Speed	Dynamically balanced solid steel disc rotates at 1500 RPM
Blades	4 reversible, heat-treated with chrome content
Anvil	4 sided anvil/cutter bar
In-Feed Opening Size (in)	9h x 9w (22.86cm x 22.86cm)
Feed Roller Style	1 x horizontal roller 38.1cm (15") in diameter x 22.86cm (9") wide with 10 knife blades (Feed roller can be reversed without starting up the disc, feed roller has hydraulic jack for manually lifting the roller)
In-Feed Rate	0 - 46 meters/min (0 - 150 fpm)
Hydraulic System	Smart Feed system with instant reverse and 'Try-Again' feed system.

Electrical

System Voltage	12 volt
Lighting	LED road trailer lighting to meet NZ requirements

Trailer

Road Towable	Yes
Torsion Axle Suspension	15" tyres, heavy duty fenders
Wheel Base Width (in)	80

Imported and fully supported in New Zealand by STEVENS PRODUCTS LTD

Professional Bear Cat dealer service and backup with mobile mechanics on call.
